SURVEY OF AGRICULTURAL DATA FOR THE USSR, 16 - 30 APRIL 1953

Comment: This report presents information, from 16 - 30 April 1953 Soviet newspapers, on agriculture in 12 of the union republics of the USSR. Progress and statistical data are given on the following: sown area, crops, mechanization, and fertilization.

Numbers in parentheses refer to appended sources.

Karelo-Finnish SSR

The following table shows percentage fulfillment of the 1952 - 1953 plan for repair of tractors and agricultural machinery in MTS, LMS (meadow improvement stations), and sovkhoses of the republic:

Latvian SSR

Spring came to the republic exceptionally early in 1953. The snow melted considerably faster than in other years. The soil warmed up and dried out quickly. Winter crops and grasses had resumed growth by 15 April.

Under such circumstances, there should be no delay in preparing the soil and beginning to sow spring crops. Mid-April is the best time for sowing spring grain crops, perennial grasses, flax, and green crops for the grazing of cattle. According to the data of scientific research institutions of the republic gathered over many years, spring grain crops sown early (in April) have a great advantage over crops sown at the intermediate time (in May). Oats sown in April yield 20-30 percent more than oats sown in May. Barley sown early yields 2.5 quintals more per hectare than barley sown at the intermediate time, and 6 quintals more than barley sown very late. Peas sown early yield about 5 quintals more than peas sown at the intermediate time. Delay in sowing peas has a distinct reductive effect on the harvest.

Flax is also a crops which requires early sowing. Flax sown in April is less susceptible to fungus diseases and insects than flax sown later, and produces better quality fiber. Expert flax growers always sow flax early, since flax sprouts can withstand 4-degree below zero frost.(5)

Belorussian SSR

In 1953, the area devoted to sugar beets in kolkhozes of the republic is being expanded by 4,000 hectares.(6)

The following table shows percentage fulfillment of the 1952 - 1953 plan for repair of tractors and combines in MTS of the republic and of the 1953 plan for application of local fertilizers (manure and peat) to kolkhoz fields of the republic:

Ukrainian SSR

In 1952, kolkhozes and sovkhoses of the republic delivered 31 million more quintals of sugar beets to the sugar factories than in 1940. Kolkhozes of Odesskaya Oblast grew and delivered to the state an average yield of 237 quintals per hectare, 51 quintals more than called for by plan. Many kolkhozes and rayons of Odesskaya, Kirovogradskaya, Poltavskaya, Chernovitskaya, and Vinnitskaya oblasts exceeded the yield goal set by the directives on the Fifth Five-Year Plan for the last year of the plan period. In some rayons and kolkhozes, particularly of Kamenets-Podol'skaya, Ternopol'skaya, and Zhitomirskaya oblasts, the 1952 sugar beet harvest was smaller than in previous years. The excuse that the weather was unfavorable, made by the heads of some MTS and kolkhozes, was not valid, since neighboring kolkhozes achieved high yields. The real reason for lower harvests was the fact that beets were not sown and cared for at the proper times.

By 17 April of this year, sowing of sugar beets was in full swing in the republic. Kolkhozes of Chernovitskaya Oblast had completed sowing, almost 15 days earlier than in 1952. Kolkhozes of Volynskaya Oblast had finished sowing of early spring crops by 17 April, 15 days earlier than in 1952. The plan for sowing of spring wheat was exceeded.(10)

As of 15 April, sugar beets were being sown in 15 oblasts of the republic; sowing of early spiked grain crops had been completed in Izmail'akaya, L'vovskaya, Nikolayevskaya, Odesskaya, Rovenskaya, and Chernovitskaya oblasts; kolkhozes and sovkhoses had completed sowing of sunflower in Zakarpatskaya, Izmail'skaya, and Khersonskaya oblasts; supplemental fertilization had been carried out on 200,000 hectares in Zaporozhskaya, Nikolayevskaya, Khersonskaya, and other oblasts, by the Civil Air Fleet. In 1953, planes will be used to perform 30 types of work.(11)

The following table shows percentage fulfillment of 1953 plans for sowing of spring crops in kolkhozes of the republic:

In 1952, the area sown to cotton in the republic increased by 54 percent, as compared with 1945; during this period, the yield more than doubled. In 1951, 37 percent of the cotton-growing kolkhozes of the republic obtained a yield of more than 20 quintals per hectare.(36)

Tadzhik SSR

Kolkhozes and sovkhozes of the republic finished sowing cotton on 22 April. Sowing was carried out in an especially organized manner in the Gissar Valley, where sowing was completed sooner than in the Vakhsh Valley.(40)

The following table shows final published percentage fulfillment of the 1953 plan for sowing of cotton in kolkhozes and sovkhozes of the republic, as of 21 April (41):

<u>Rayon</u>	<u>Fulfillment</u>	<u>Rayon</u>	<u>Fulfillment</u>
Mikoyanabadskiy	100.0	Regarskiy	100.0
Molotovabadskiy	100.0	Gissarskiy	97.0
Shaartuzskiy	100.0	Parkharskiy	95.4
Voroshilovabadskiy	100.0	Ordzhonikidzeabadskiy	94.4
Ashtskiy	100.0	Pakhtaabadskiy	92.7
Kanibadamskiy	100.0	Kirovabadskiy	89.0
Moskovskiy	100.0	Kuybyshevskiy	84.1
Dangarinskiy	100.0	Kolkhozabadskiy	70.1
Shurcabadskiy	100.0	Kzyl-Mazarskiy	65.9
Isfarinskiy	100.0	Kulyabskiy	62.3
Oktyabr'skiy	100.0	Kangurtskiy	60.0
Leninabadskiy	100.0	Fayzabadskiy	--
Kaganovichabadskiy	100.0		
Dzhilikul'skiy	100.0	<u>Sovkhozes</u>	
Kurgan-Tyubinskiy	100.0	Kafirnigan	100.0
Stalinabadskiy	100.0	Imeni Kuybyshev	100.0
Proletarskiy	100.0	Stalinabadskiy	100.0
Nauskiy	100.0	Imeni Kirov	95.0
Kortashskiy	100.0	Miten-Tugay	80.0
Rakhatinskiy	100.0		
Shakhrinauskiy	100.0		

Kirgiz SSR

The following table shows percentage fulfillment of 1953 plans for spring field work in kolkhozes of the republic, as of 15 April (42):

<u>Oblast</u>	<u>Sowing</u>			<u>Harrowing</u>	
	<u>All Spring Crops</u>	<u>Cotton</u>	<u>Perennial Grasses without Cover Crop</u>	<u>Winter Crops</u>	<u>Perennial Grasses</u>
Dzhalal-Abadskaya	42.8	41.2	42.0	61.8	63.0
Frunzenskaya	62.2	1.1	9.0	46.1	30.5
Issyk-Kul'skaya	22.4	--	32.0	48.9	66.9
Oshskaya	46.6	42.1	42.6	33.9	42.9
Talasskaya	61.1	--	31.2	45.5	50.0
Tyan'-Shan'skaya	4.6	--	--	--	--
